

How we show we care

Our values and behaviours

People feel **cared** for as individuals

People feel **safe**, reassured and involved

People feel confident we are **making a difference**

People feel teamwork, trust and **respect** sit at the heart of everything we do

Compassionate

I treat others with kindness and respect, and in a manner I would want for our own friends and family

Calm

I stay calm, approachable, and professional even when things are tough

Collaborative

I work with others to give the best possible care for our patients

Accountable

I take personal responsibility for helping to give the best care and always ask how we can make things better

Honest

I do the right thing and speak up when others don't

Inspiring

I motivate others and take them with me

“Be proud to live the Trust **values** and **behaviours**, and to expect others to do the same”

We care
